

ALUMINUM(III) ACETYLACETONATE

CAS No. 13963-57-0

Specifications:

Tests	Specification
Appearance	White Crystalline Powder
Assay	≥99.0%
Al	8.00~8.60%

Package: 25Kg/Carton

Application:

- It is mainly used as curing accelerator for epoxy resin, cross link agent for phenol, silicone, acrylic resin. It can improve adhesive force to white ink, transparent ink and other printing ink while not darken the color. Chelation is reacted between Aluminum acetylacetonate and phenolic antioxidant in the base material & printing ink and paint union, to improve the adhesive force of electron adhesion agent.

Storage: Keep container tightly closed in a dry and well-ventilated place.

Recommend Shelf Life: 12 months.
