

LANOX 1010

Pentaerythritol tetrakis(3,5-di-tert-butyl-4-hydroxyhydrocinnamate)

CAS No. 6683-19-8

Specifications:

Item	Specification
Appearance	White powder
Assay	≥94.0%
Effective content	≥98.0%
Volatile	≤0.50%
Moisture	≤0.50%
Ash	≤0.10%
Melting point	110.0~125.0°C
Transmittance	425nm ≥96.0% 500nm ≥98.0%

Package: 20Kg Bag

Application:

LANOX 1010 is a typical representative of hindered phenol antioxidants, non-poisonous, non-discoloring as well as non-staining and is an excellent top quality approved in international. It is widely used in a variety of polymer materials, such as PP, PE, Polyester, Polyurethane, Polystyrene, Polyoxymethylene, PBT, ABS, Polyamide, synthetic Rubber and etc. It's also a high-grade antioxidant for natural and synthetic oil. Recommended dosage is 0.1~0.3%.

Storage: Keep container tightly closed in a dry and well-ventilated place.

Recommend Shelf Life: 12 months
