

# LANOX CPL

## Poly(dicyclopentadiene-co-P-cresol)

CAS No. 68610-51-5

### Specifications:

Items	Specification
Appearance	White powder
Melting point	≥115 °C
Volatile	≤0.5%
Ash	≤0.15%

**Package:** 20/25Kg Carton

### Application:

- It is a kind of antioxidant with high durability, low volatility, no pollution and no discoloration. It can prevent discoloration, aging, heat resistance and flex cracking of products.
- In the plastic industry, this product is one of the commonly used antioxidants of polyolefin, acrylic and POM. It can also be used in tire sidewall, sole and latex products.
- Suitable for transparent, white or light-colored products such as natural rubber, synthetic rubber and latex.

**Storage:** Keep container tightly closed in a dry and well-ventilated place.

**Recommend Shelf Life:** 12 months
