

YAC-A212

N-aminoethyl-3-aminopropylmethyldimethoxysilane

CAS No. 3069-29-2

Specifications:

Items	Specification
Appearance	Colorless transparent liquid
Assay	≥97.0%
Chloride	≤20ppm
Density	0.960~0.980g/cm ³
Refractive index	1.440~1.450

Package: 190Kg Drum

Application:

- Adhesion promoters in polysulfide, polyvinyl chloride plastisol, silicone two-part urethanes and epoxy adhesives and sealants.
- Additives in phenolic and epoxy molding compounds.
- Additives to latex coatings adhesives and sealants.
- Adhesion promoters in one-part silylated urethane adhesives and sealants based on Performance Materials SPUR+ prepolymer technology.

Storage: Keep container tightly closed in a dry and well-ventilated place. Container which are opened must be carefully resealed and kept upright to prevent leakage. Store in cool place & under inert gas. Moisture sensitive.

Recommend Shelf Life: 12 months
