

# YAC-BDAC

## Di-tert-butoxy diacetoxysilane

CAS No. 13170-23-5

### Specifications:

| Tests            | Specification                |
|------------------|------------------------------|
| Appearance       | Colorless transparent liquid |
| Active content   | ≥85%                         |
| Density(g/ml)    | 1.02                         |
| Refractive index | 1.4040                       |

**Package:** 200Kg Drum or 1000Kg IBC Containers.

### Application:

YAC-BDAC is a clear and almost colourless fluid with a typical smell (vinegar). It readily hydrolyses upon contact with moisture.

YAC-BDAC has a strong hydrolytic activity and can hydrolyze with water without catalyst at room temperature. The hydrolysis activity is between alkoxysilane and chlorosilane.

YAC-BDAC is to take off the acetate type RTV 1 adhesion promoter, promote the caking property of aluminium and other metal base material. The amount is about 0.3 to 0.5%.

**Storage:** Store in the shade. Keep container closed and store in a dry and ventilated place. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

**Recommend Shelf Life:** 12 months
