LANYACHEM
"The Chemistry We Serve"

YAC-N212

Dimethyldimethoxysilane

CAS No. 1112-39-6

Specifications:

Tests	Specification
Appearance	Colorless transparent liquid
Assay	≥99.0%
Methanol	≤1.0%

Package: 170Kg/Drum

Application:

- Used for the preparation of functional silicones, silanes, and polysiloxanes (silica gel, silicone oil, silicone resin), it can serve as a treating agent for fumed silica and as an anti-structuring material. It is also an excellent structure control agent for compounded silicone rubber, with performance far surpassing that of hydroxy silicone oil.

Storage: Keep away from heat and fire sources, take measures to prevent the accumulation of static electricity; store in a cool, dry, well-ventilated place, and keep the container sealed before use.

Recommend Shelf Life: 12 months.
