

YAC-TMCS

Trimethylchlorosilane

CAS No. 75-77-4

Specifications:

Items	Specification
Appearance	Colorless transparent liquid
Purity (GC)	≥99.0%
Methyltrichlorosilane	≤0.10%
Tetrachlorosilane	≤0.10%

Package: 170Kg Drum

Application:

- Mainly used to manufacture and capping agent YAC-HMDSO, YAC-HMDS, protective reagent for active radical group of antibiotics and etc.
- In petroleum production and other processes, it can be used as sealing agent of silicone polymer and adjust the molecular weight of polymer.
- Used as coatings for silicon and glass surfaces, and in the production of silicone polymers.

Storage: Storage at ventilate and dry place and prevention from water, heat and fire; It should be kept away from oxidant, acid and alkali. Handling according to hazardous substances and prevention from exposing to sunlight and rain. Be careful when loading and unloading to avoid damages of the package.

Recommend Shelf Life: 12 months
