

YAC-N823

N-octyltriethoxysilane

CAS No. 2943-75-1

Specifications:

Items	Specification
Appearance	Colorless transparent liquid
Assay	≥98.0%
Color	≤20APHA
Density	0.8740~0.8840g/cm ³
Refractive index	1.4120~1.4220

Package: 180Kg Drum

Application:

- Premium-grade penetrating sealers are easily formulated by blending 10%~40% YAC-N823 in alcohols or organic solvents
- Reinforced concrete structures can be protected from water and waterborne salt that normally cause corrosion of reinforcing steel, deterioration and weathering. Normal abrasion resistance, surface appearance and most other desirable properties remain unchanged with YAC-N823.
- Water-repellent surfaces created by the use of formulations containing this silane retain normal vapor transmission. Reduced efflorescence and staining are provided with the deep-penetrating solutions of YAC-N823.

Storage: Keep container tightly closed in a dry and well-ventilated place. Store in cool place & under inert gas. Moisture sensitive.

Recommend Shelf Life: 12 months
