

YAC-V1006

Vinyl MQ Resin

CAS No. --

Specifications:

Tests	Specification
Appearance	Light yellow or colorless transparent viscous liquid
Solid content	75% toluene solution
Molecular weight	1000-6000
Silicon hydroxyl content	0.5-3.5%
Vinyl content	0.1-3%
Burning residue content	60-65%

Package: 20Kg Drum,200Kg Drum.

Application:

- In the pressure sensitive adhesive industry, it can improve the cohesion strength of silicone pressure sensitive adhesive and adjust the stripping force.
- Transparent reinforcement, in addition to forming silicone rubber can improve cohesion strength and adhesion.
- Adhesive, used for sealant, coatings, mica plate and glass fiber laminate adhesive.
- Other, such as defoaming agent, release agent, anti - adhesive and brightener.

Storage: Store in an airtight container in a cool, dry, ventilated place at room temperature.

Recommend Shelf Life: 12 months.
