YAC-IC313

3-Isocyanatopropyltrimethoxysilane

CAS No. 15396-00-6

Specifications:

Tests	Specification
Appearance	Colorless transparent liquid
Color (Pt-Co)	≤30
Assay	≥98.0%
Density (25℃)	1.050~1.090g/cm^3
Refractive index (nD^{25})	1.4100~1.4300

Package: 200Kg/Drum

Application:

- It can be used as silane crosslinking agent for one part moisture curable urethane adhesives, sealants and coatings.
- It can also be used as adhesion promoters for single part moisture curable and dual-part reactive urethane systems.
- It can be used as adhesion promoters for silicone coatings or sealants, to enhance adhesion to organic substrates with active hydrogen atoms.

Storage: Keep away from heat and open flame.

Recommend Shelf Life: 12 months.
