

MAGNESIUM ACETYLACETONATE

CAS No. 68488-07-3

Specifications:

Tests	Specification
Appearance	White crystalline
Content of magnesium	10~12%
Assay	≥95.0%

Package: 25Kg/Drum

Application:

- This product can be used as an additive and is the most commonly used heat stabilizer in formulations of halogenated polymers, especially polyvinyl chloride. It is also used as a catalyst and can be used for resin cross-linking.

Storage: Store in a cool, dry, and well-ventilated place like general chemicals, away from fire, heat sources, strong oxidizers, and strong reducers.

Recommend Shelf Life: 12 months.
