

TETRABUTYLUREA

CAS No. 4559-86-8

Specifications:

Tests	Specification
Appearance	Colorless transparent oily liquid
Assay	≥99.50%
Moisture	≤0.10%
DIBUTYLAMINE	≤0.10%
SULFUR	<5ppm
CHLORINE	≤10ppm
Density (20℃)	0.874~0.880g/cm ³

Package: 900Kg/IBC

Application:

- It is mainly used as hydrogen anthraquinone solvent in the new process of producing hydrogen peroxide by anthraquinone method. Compared with trioctyl phosphate, hydroanthraquinone has higher solubility, The distribution coefficient of H₂O₂ in two phases is large; tetrabutyl urea has the advantages of large density difference with water and large surface tension.

Storage: The product should be stored in a cool, dry, and well-ventilated place. Keep away from fire, heat, water, and moisture.

Recommend Shelf Life: 12 months.
